ICA POLICY SETTING PROCESS

Policy input is gathered from producer members year-round through listening sessions, District Meetings and an annual survey. A Cow-Calf Council and Feedlot Council also provide input.

Twice a year, the Iowa Cattlemen's Association (ICA) Policy Committees meet to develop policy based on that input. All ICA members are invited to participate in policy discussion and vote at the Policy Committee Meetings.

Policies adopted in the summer committee meetings are taken to the ICA board, who has the authority to adopt interim policy when needed.

Policies adopted in the committee meetings are taken to the ICA Annual Meeting, which takes place in the winter. At the Annual Meeting, all members present are able to vote on the policies.

The ICA Board of Directors, Executive Committee and Staff are all guided by the policies adopted at the Annual Meeting. ICA policies provide the framework for these groups to enforce, improve or change legislation and programming to support Iowa's cattle producers throughout the year.

ICA presently has three standing policy committees, they are:

- Beef Products Committee
- Business Issues Committee
- Cattle Production Committee

Below is the contact information for Policy Committee Chairs.

IOWA CATTLEMEN'S ASSOCIATION BOARD CONTACTS

Producers have a voice in setting priorities and developing policy to support Iowa's cattle industry. ICA policies are developed at the ICA Annual Meeting and the policies are taken before the Iowa Legislature or the National Cattlemen's Beef Association Annual Convention. These policies result in new programs, laws or regulations that improve the state and national business climate for

the beef industry. ICA monitors many issues and programs and has been instrumental in developing new programs.

The ICA Board of Directors is made up of an Executive Committee, 20 District Directors and 11 Directors at Large. Feel free to contact them at anytime.

THEREFORE, BE IT RESOLVED, the Iowa Cattlemen's Association provide the following recommendations to Congress and the U.S. Department of Agriculture for formulating and administering future farm policies:

1. Eliminate from all farm programs discrimination against the cattle industry in the area of base acreage and normal crop acres, base yields, loan privileges, including hay and silage loans, and soil conservation.
2. Farm policies should be developed having both long and short term objectives.
3. The intent of American farm policy should be profitable markets with emphasis on producing and exporting value added products.
4. Farm programs should be market oriented though providing a price safety net somewhere below the variable cost of production which could be adjusted seasonally.

BUSINESS ISSUES COMMITTEE

5. Strategic reserves should be maintained as hedges against disaster and to assure the world that the United States is a reliable supplier. Reserves should NOT be used to control or influence prices.
6. Farm policy must promote soil conservation and the best use of resources.
7. Policies should not be formulated so as to favor one segment of agriculture over another.
8. If Federal Crop Insurance is to continue and be considered as part of future farm programs, it must become more cost efficient and coverage should be expanded to cover the commonly produced pasture and hay crops. Yield coverages must be raised and should be calculated on a field-by-field and farm-by-farm basis.
9. Fiscal responsibility is a concern of Iowa cattlemen. We recognize that all segments of our economy will have to respond by decreased spending to facilitate balancing the budget; however balancing the federal budget with proportionate cuts in spending should not be accomplished at the expense of the cattle industry and agriculture.
10. We endorse efforts to reduce the real interest rates for agriculture.
11. Future farm legislation should be announced in accordance with the September 15 statutory deadline.
12. The importance of local governance and oversight at Farm Services Agency offices increases with the complexity of current farm programs (e.g. LDP payments). Iowa Cattlemen's Association strongly urges that local boards be empowered to make decisions regarding strictly local issues and/or entities.
13. Conservation Reserve Program (CRP) rental rates should reflect private sector pasture rental rates and should not be on the leading edge of these rates.
14. Field borders with an Erodibility Index greater than 15 and agricultural drainage wells should be eligible for inclusion as conservation practices in the continuous sign-up of land in the CRP.
15. Allow managed haying and grazing and emergency haying and grazing provisions with a payment reduction at fair and reasonable rates to be determined by the Secretary of Agriculture on not only CRP but CRP buffers to improve water holding and filtering capacities.
16. A minimum of 60% of the Environmental Quality Incentives Program funds be spent on livestock conservation and incentive production projects on a federal basis.
17. Allow managed grazing on land that is enrolled in continuous sign-up of CRP under the provisions outlined in the Conservation Reserve Program.
